SUMMARY

I am a web developer who is passionate about new web technologies and building applications. I have an extensive background in business to business sales and have experience leading teams. I am looking for an opportunity that will allow me to use my skills to create meaningful applications and continue to grow my technical knowledge.

SKILLS

Front End: JavaScript, React, Apollo, Jest, jQuery, HTML5, CSS3, BootStrap
Back End: Node.Js, REST APIs 3

PROJECTS

Noteful| github.com/calebgrove-git/noteful
- Developed an application that allows for storing notes in separate folders and posting that info to a server
- Tech: React, React Router, Node, BootStrap, RESTful APIs, Javascript

Peer | github.com/calebgrove-git/PEER
- Designed and developed a single page application that validates grammar and HTML markup then offers suggestions to fix any errors
- Tech: jQuery, CSS, HTML, RESTful APIs, JavaScript

Trelloyes | github.com/calebgrove-git/trelloyes
- Developed a Trello board application for easily tracking and staying up to date on future goals.
